I- Reading (2pt)

Internet shopping: the inside story

Dalya Rahman specializes in setting up e-commerce systems. Here, she tells 'New Careers' magazine about her job.

I work with B2B (business-to-business) e-commerce systems as well as B2C (business-to-consumer) systems and integrate all the components: the user interface, the shopping basket and the payment system. The user interface is the part shoppers see on their screens. For this, I work closely with designers to make it look good; it's important that customers enjoy using it.

When customers see an item that they want to buy, they put it in their shopping basket. To set this up, I usually integrate standard software packages with the company's website. This software uses small files that the browser puts on the user's computer, called cookies, to track the items in the basket. This stage isn't too difficult – mostly I just match up the code with the client's website.

The next step is the payment processing system. This takes the customer's information – delivery address, credit card number, etc. It processes the payment and outputs the details so that the company can send out the order. This component is more complicated: I have to integrate it into several different systems, including the company's accounting system. Fortunately, there's a special data format, EDI, that is Electronic Data Interchange, which makes this easier. EDI is standard in e-commerce systems so that other kinds of software, such as accounting systems, can accept data from it.

Read the text and complete and answer these questions:

- 1 put together two or more things so that they work well together (paragraph 2) _____
- 2 computer programming instructions (paragraph 3) _____
- 3 taking a series of steps to do something (paragraph 4) _____
- 4 For which component is appearance important?
- 5 For which component is programming mentioned?
- 6 Why is EDI useful?

II- Vocabulary (3pt)

Match 1–6 to a–f. Then complete the gaps with **because, so, to or for** to make sentences.

- | | |
|---|---|
| 1 Back up everything | d _____ safety. |
| 2 Put the DVD in the drive | e _____ that the process can start. |
| 3 Press 'F2' while rebooting the computer | a _____ enter the BIOS. |
| 4 During the installation process, the computer will ask you some questions | f _____ it needs to know some information, such as where you are. |
| 5 You might want to partition the hard drive | c _____ use the different partitions for different purposes. |
| 6 Change the boot drive to the optical drive | b _____ that the computer restarts from the operating system DVD. |

III- Grammar (3pts)

A- Choose the correct form (Past Simple or Present Perfect)
